

REPORT  
OF THE  
Charity Hospital  
OF LOUISIANA  
AT NEW ORLEANS

July 1st, 1944 to June 30th, 1945

HIS EXCELLENCY JIMMIE H. DAVIS  
Governor of Louisiana and Ex-Officio President  
Board of Administrators

1832 CHARITY HOSPITAL 1938

WAS FOUNDED IN THE YEAR 1786

BY

DON ANDRES ALMONASTER Y ROXAS,

To whose generous endowment, the munificence of the  
LEGISLATURE OF THIS STATE,  
and the liberality of the State of Pennsylvania,  
the community is indebted for the means of  
erecting this edifice, built in the year

1832

His Excellency A. B. Roman, being Governor and  
Ex-Officio President of the Institution.  
To record which and inscribe hereon the names and  
contributions of its distinguished benefactors.

THIS TABLET HAS BEEN ERECTED.

## Form of Gift or Bequest

....

I give to the Board of Administrators of the Charity Hospital of Louisiana at New Orleans the sum of

FIVE HUNDRED DOLLARS

to be added to the Children's Bed Endowment Fund.

.....  
*Full Name*

*Date*

.....  
*Address*

Resolution unanimously adopted by the Board of Administrators at meeting of June 22nd, 1942:

WHEREAS, The care and comfort of the little afflicted children often times requires some form of amusement, entertainment or special services, not otherwise provided for,

THEREFORE, BE IT RESOLVED, That a fund be established whereby gifts or bequests to this fund to be designated as the *Children's Bed Endowment Fund* be accepted upon the following conditions, to-wit: That the principal be set aside unimpaired in perpetuity, and same be invested in high grade securities, and the income therefrom be dedicated and used exclusively for the care and comfort of the afflicted children receiving treatment in this hospital. Furthermore, a suitable tablet be placed in the Children's Ward, with the name of the donor and date of gift inscribed thereon.

LOUIS G. RIECKE  
Vice-President, Board of Administrators

**JOINT REPORT OF  
THE VICE-PRESIDENT AND THE DIRECTOR**

July 1, 1945

HIS EXCELLENCY, JAMES H. DAVIS,  
Governor of the State of Louisiana  
and Ex-officio President of the Board of Administrators  
of Charity Hospital of Louisiana at New Orleans.

HONORABLE ROBERT L. PETTIT, Director  
Department of Institutions  
Baton Rouge, Louisiana

Gentlemen:

The Vice-President of the Board of Administrators and the Director of the Charity Hospital of Louisiana at New Orleans submit the following report of the activities of the Hospital covering the period from July 1, 1944 to June 30, 1945 inclusive.

**Board of Administrators** The terms of the following Board members expired during this period and they were re-appointed for a period of four years, their terms expiring August 4, 1948.  
 Mr. William J. Kross  
 Mr. Louis G. Riecke

The Board of Administrators at its annual meeting re-elected Mr. Louis G. Riecke as Vice President of the Board.

The Vice President appointed the following standing committees:

**Finance Committee:**

Mr. F. S. Weis, Chairman  
 Mr. John X. Wegmann  
 Mr. William J. Kross

**Medical Committee:**

Dr. E. J. Richard, Chairman  
 Mr. Charles A. Farwell  
 Mr. F. S. Weis  
 Mr. Walker Saussy  
 Mr. William J. Kross

**House Committee:**

Mr. Charles P. Fenner, Jr., Chairman  
 Mr. William J. Kross  
 Mr. Charles A. Farwell

**Public Relations Committee:**

**Administrative Changes** Mr. Walker Saussy  
 Mr. F. W. Matthews was re-elected Secretary-Treasurer of the Hospital.

Dr. R. L. Pullen was appointed Assistant Director of this Hospital by the Governor of the State.

Dr. O. P. Daly was reappointed by the Governor as Director of the Hospital.

**Richard Milliken Building**—This building is now the only building on the grounds of the Charity Hospital which is not occupied. The Board of Administrators has under consideration plans for the renovation and use of this building as one of the post-war projects of this Hospital.

Hospital  
Buildings

**Lapeyre-Miltenberger Building**—On April 1, 1944, the Lapeyre-Miltenberger Building was placed in operation for the care of convalescent patients and has functioned satisfactorily throughout the year. By the facilities afforded in this building, it has been possible to transfer convalescent patients from our active medical and surgical wards, thus making available more hospital beds for the use of acute cases and at the same time affording to our convalescent patients the opportunity to spend their convalescence in pleasant surroundings with constant medical and nursing attention.

**Delgado Building**—On May 8, 1944, this building was placed in operation for the treatment of Venereal Diseases. This building was leased to the State Board of Health and has been constantly operated throughout the year for the treatment of women with venereal diseases. The facilities afforded by the use of this building has made possible the treatment of hundreds of young women who are victims of venereal diseases, and has been of great assistance to the surrounding community in the prevention of venereal disease, with particular reference to the armed forces of our Government, at whose suggestion this building was made available for this purpose.

**Old Female Medical Building**—The 3rd floor of this building has been in use for the care of poliomyelitis cases. During the past year, because of the increased demands made on the poliomyelitis unit, it was necessary to completely repair and renovate the 2nd floor, thus making available approximately sixty beds for the care of poliomyelitis cases. From July 1, 1944 to June 30, 1945, there were 103 cases of poliomyelitis admitted and treated in this center. 85% of all poliomyelitis cases throughout the entire State which has been reported to the Louisiana State Department of Health, were admitted and treated in this poliomyelitis center. This is truly a State-wide project, and is the only unit of this kind in operation in the entire South.

**Colored Tuberculosis Building**—This entire building has been completely repaired and renovated and is devoted exclusively to the care of colored tuberculosis cases. There is a continuous waiting list of patients who wish to be admitted to this building and the building is always crowded.

**Dibert Memorial Building**—This building is set aside for the care of white tuberculosis cases, and is fully occupied at all times.

We desire to again call the attention of all individuals in authority in the State of Louisiana to the great

need for additional facilities for the care of tuberculosis patients. Tuberculosis units in this Hospital are set up primarily for the care of acute tuberculosis cases. In other words, those which are susceptible to treatment and for whom something can be done. It is most unfortunate that this Hospital is forced to care for a large number of chronic incurable tuberculosis cases, cases for which little can be done from the standpoint of the possibility of a cure, and yet it is impossible for this Hospital to discharge these cases, both from a humane standpoint because they have no place to go, and from the standpoint of safety of the citizens of our State because these individuals constitute a constant menace to other people unless adequate protection is thrown about them. Because our beds are occupied by these chronic cases, it is impossible for this Hospital to render treatment to many early cases of tuberculosis which is most unfortunate because it is a well established fact that if we ever hope to cure tuberculosis, the treatment must be begun early and time is of great importance to these unfortunate individuals. We can not too strongly urge the development of an adequate program to care for these chronically incurable cases of tuberculosis. A program which will permit hospitals such as this to keep all tuberculosis beds in an active condition for occupancy by patients to whom we can reasonably hold out the hope of the possibility of a cure and restoration to useful lives.

**Isolation Building**—This building is set aside for the care of infectious and contagious diseases and is the only unit of this kind in existence in or about New Orleans. During the past year this building was completely renovated and repaired and has rendered excellent service.

**Student Nurses Home**—During the past year this building which is for the care of under-graduate student nurses, as a dormitory, class-rooms, assembly rooms, library, dining rooms, etc., has been taxed far beyond its capacity because of the enlarged student nursing program entered into by this Hospital at the request of the Federal Government. The building has been kept in a satisfactory state of repair and has rendered excellent service.

**Graduate Nurses Home**—This building which had been previously placed in excellent repair has continued to function as a dormitory for use by graduate nurses who are on duty in the wards of this Hospital. The availability of this building has materially assisted the Hospital in maintaining a skeleton staff of graduate nurses. The housing situation in New Orleans has been most difficult and this building has provided convenient, comfortable quarters for our graduate nurses, many of whom were unable to obtain suitable living accommodations.

**Old Ambulance House**—This building has been completely repaired and renovated and is being used as living quarters by the female physicians who are members of our intern and resident staff.

**Sisters Home**—This building is used exclusively by the Sisters of Charity who are assigned to this Hospital and affords them living quarters and a chapel for their religious devotions. It has been kept in excellent state of repair and we propose to do everything possible to keep these fine women comfortably housed.

**The Main Building**—The settlement of the Main Hospital Building is becoming more and more stabilized and the rate of settlement is decreasing. The settlement during this past year has been more even throughout than previously. This continuous settlement is a constant source of expense to the Hospital in that repair crews must be constantly on duty repairing the damage done. No apparent structural damage exists and all facilities of this building are in an excellent state of operation.

**Covered Passageways**—Covered walks have been erected throughout the Hospital grounds giving protection to the Hospital employees, to the patients, to the doctors and to the Sisters and nurses. A covered walk leading to the Students Nurses quarters, which is some distance away from the Main Building, has afforded for the first time protection to our nurses during inclement weather on their trips to and from the Main Hospital Building.

**Laundry**—The Charity Hospital operates the largest laundry in the City of New Orleans, and this department has operated satisfactorily throughout the year. It is necessary at this time to call your attention to the fact that some of the mechanical equipment in the Laundry is badly worn and unquestionably will have to be replaced.

**Warehouse**—This building has provided excellent service throughout the year; however, it is far too small, and additional space should be provided. At the present time sufficient storage space is not available and because of this fact it is impossible for the Hospital to take advantage of lower prices obtainable when merchandise is bought in large quantities. This has worked a particular hardship during the past year because of the uncertainty of being unable to obtain merchandise at all, and the necessity of purchasing in quantities whenever merchandise was available.

**Hospital Garage**—This building has been maintained in a satisfactory condition and has rendered good service; however, there is not sufficient storage space to permit protection of the automotive equipment belonging to this Institution. Additional garage space for the protection of this automotive equipment from the weather should be provided.

**Main Powerhouse**—This building and its contents which include the power plant for the entire Institution, machine shops, refrigeration and air-conditioning machinery, has been kept in an excellent state of repair.

**Maintenance Building**—This is an old building facing on Perdido Street, is a fire hazard, and is far from being adequate for the housing of the carpenter shops, repair

#### Mechanical Departments

shops, paint shops, plumbing and electrical repair departments. Little, if anything, can or should be done towards the repair or renovation of this building, which should be torn down and replaced by a modern fire-proof structure.

#### Automotive Equipment

The automotive equipment belonging to this Institution is, with few exceptions, practically worn out. Much of it is no longer susceptible of being repaired and repairs in most cases are no longer economical. Additional equipment will have to be purchased when and if such equipment is available.

#### Patients' Services

**Department of Medical and Surgical Care**—This department, which is under the direct supervision of the Director of the Hospital and his assistant, Dr. R. L. Pullen, is charged with the actual medical and surgical care of all patients seeking assistance in this Hospital. Our main problem has been one of lack of personnel which has necessitated the closing of certain sections of the Hospital while at the time our patient-load has increased.

The Federal Government, through its Procurement and Assignment Service, has rigidly limited this Hospital as to the number of resident and interns which we are permitted to employ. This has thrown an enormous burden on the professional staff. During the past year there has been only one assistant to the Director of the Hospital, where previously there had been two or three. Prior to the beginning of the war, the Hospital employed sixteen full-time physicians in the Admitting Rooms of the Institution. During the past year, we have been able to obtain the services of only two to seven physicians in this department, with frequent replacements. When one considers that from 500 to 800 individuals apply every 24-hours to these rooms, all of whom must be seen and examined, it is easily understandable why it has been impossible for this Hospital to give the type of service we would like to give to our patients in this particular department. Consequently, many patients have been forced to wait before being seen and examined. Every effort is made to examine the very ill patients immediately. Patients who are not seriously ill are asked to wait until they can be examined. This, of course, has worked a hardship on our patients. We are endeavoring to obtain more physicians for this purpose, but under conditions existing during the past year, it was almost impossible to obtain doctors.

**Visiting Staff**—The visiting staff of this Hospital has been badly depleted because of the service in the armed forces of many of our physicians who are most active in the care of patients in this Hospital. The authorities of this Hospital and the patients who have sought treatment within this Hospital owe a debt of gratitude to those members of the medical profession, both resident physicians and visiting physicians, who have given so generously to their time and skill during this very critical period.

Re-arrangement of steam lines, water lines, sewerage system, air-conditioning equipment and general mechanical repairs throughout the entire Hospital have been carried out during the year.

General  
Repairs

In the past year, the temporary structure in the rear of the Milliken Building was demolished and the grounds cleared up, thus removing an unsightly building from the front of the Louisiana State University Medical Building, and giving the occupants of that building better ventilation and sunlight.

The close coordination of effort by these two departments has brought about substantial financial savings to this institution. Mr. L. A. Millet, the Chief Accountant, provided detailed and accurate information each month so that your Director and Board of Administrators were fully informed at all times as to expenditures by the departments and each department kept, insofar as was possible within its budget. Mr. Fred W. Matthews, at the close of this fiscal year, is now in his 32nd year of service to this Institution as Secretary-Treasurer. This genial gentleman has been of inestimable value to your Board of Administrators and your Director, particularly with respect to the handling of legacies and endowments. The system installed in his office for the collection of funds from those patients who were found to be financially able to pay has resulted in substantial increases in collection as evidenced by the following table:

Accounting  
Department  
and  
Secretary-  
Treasurer's  
Office

Collections from pay patients for the year ending	
June 30, 1941.....	\$12,945.04
June 30, 1942.....	17,243.62
June 30, 1943.....	23,868.14
June 30, 1944.....	42,961.72
June 30, 1945.....	60,305.18

Mr. L. V. Landry, appointed by Attorney-General Fred S. LeBlanc, worked very diligently in order to effect this increase in collections.

**Nursing Service**—This important department of the Hospital is charged with the actual nursing care of the patients. During normal times this Hospital employed over 600 graduate nurses. During the past fiscal year, there were only approximately 240 graduate nurses on duty in this institution. In addition, the employment of competent maids, orderlies, etc. has presented a difficult problem because of our inability to obtain and hold trained individuals.

Hospital  
Departments

**Volunteer Organizations**—Very splendid service has been rendered by volunteers. We are happy to call attention to the 24,913 hours of service rendered by the 152 volunteer nurses aids sponsored by the New Orleans Red Cross Chapter.

**Charity Hospital School of Nursing**—This is the largest training school for nurses in the South. During normal times this training school had an enrollment of approximately 225 students. At the request of the Fed-

eral Government, we entered into the Federal Training Program for nurses and because of this program, at the end of the past fiscal year there was an enrollment of approximately 700 student nurses in our School constituting, I believe, the largest group of under-graduate cadet nurses in the United States. The Hospital is very proud of the accomplishments of this group and they are, likewise, cognizant of the great service rendered this Institution by these under-graduate student nurses without whose assistance it would have been absolutely impossible for us to have given service to our patients. It is interesting to call your attention to the number of schools affiliated with Charity Hospital School of Nursing. Ten schools of nursing located within the State of Louisiana are affiliated with this school, and nineteen schools located out of the State. By means of this affiliation student nurses from smaller hospitals are admitted by varying periods of time in order that they may obtain training in departments in which their own hospitals are deficient. Sister Henrietta is to be highly commended for her efficient handling of this department.

**Neuropsychiatric Unit**—During the past year, this Hospital set up and placed in operation a unit devoted to the care of neuropsychiatric patients. The windows and doors of this unit have steel guards offering adequate protection to our patients. Prior to the establishment of this unit there were forty beds in the Hospital set aside for the care of this class of patients. In this unit at the present time we have 84 beds. Here the patients can be carefully supervised and occupational and recreational therapy can be planned for them. This unit is under the supervision of Sister Juliana, who has had special work in neuropsychiatric nursing.

During the first part of June, two head nurses went away for supplementary work in neuropsychiatric nursing in order to be able to assist in supervision and management of this unit. While it is not yet possible to effect in this small unit all forms of therapy needed by the patients we believe that a forward step has been made towards a more efficient and more modern administration of neuropsychiatric care.

**Special Infant Unit**—In conjunction with the Louisiana State Board of Health, the Children's Bureau, and the Department of Labor in Washington, D. C., plans are being made for the establishment in the South of a center for post-graduate training in the nursing of premature infants. Charity Hospital was asked to participate in this program. Plans include the special preparation of supervisory staff members. The Children's Bureau and the State Department of Health are providing scholarships to send nurses from our staff to recognized centers of training for advanced courses in the nursing of premature infants. Additional equipment has been ordered for the special infant unit and we are at the present time waiting for 28 Gordon-Armstrong incubators and two Minnesota Thermo-Cribs. Individual heating and humidifying apparatus and additional plumbing have been

installed in the unit. By means of the care of our premature infants this Hospital has been able to reduce the mortality in this group of our patients from over 70% to less than 30%, and we hope to reduce it still further.

**Emergency Rooms and Ambulance Service**—The emergency rooms of the Hospital operate on a 24-hour basis. Approximately 95% of all accident and emergency cases throughout New Orleans area are sent to this department as the Charity Hospital maintains the only emergency ambulance service in the City of New Orleans. The Hospital operates five ambulances which are on duty 24-hours per day. Because of the depletion of our resident staff, the Hospital has been forced to operate these ambulance without physicians being in attendance except in cases where it is necessary for us to send a physician. The ambulances are almost worn out and will have to be replaced as quickly as possible.

During the past year Charity Hospital ambulances answered 11,122 calls, at an average time per call of 28.8 minutes from the time the call was received to the time the patient was brought into the Hospital.

During the past year 65,424 patients were seen and treated in the emergency or accident rooms of this Institution, an average of 180 cases every 24-hours.

Every accident case referred to this Hospital is, of course, taken care of. These patients are all investigated and those found ineligible for treatment within this Institution are sent invoices for all services rendered them, and all such funds, when collected, are remitted to the General Fund of the State of Louisiana.

**X-ray Department**—During the past fiscal year, it was necessary to purchase additional x-ray equipment in order to give adequate service to our patients. This was partly because some of the equipment in use in the Hospital had worn out, but in addition, the Hospital is striving to render better service to those patients who are suffering with inoperable cancers, as well as to improve the diagnostic services in this Institution. Because of the purchase of this equipment, it was necessary to rearrange a portion of the space set aside for the x-ray department.

Through the cooperation of the Louisiana State Board of Health, arrangements have been made for conducting an x-ray survey of all patients applying to the Admitting Rooms of this Hospital. When in operation, this unit should furnish the Hospital with a record of from 800 to 1000 chest pictures per day. These records will be of inestimable value in establishing the rate of tuberculosis among our patients. It will doubtless uncover many early treatable cases of tuberculosis and will give valuable records for statisticians who wish to make studies concerning the number of tuberculosis cases in this section of Louisiana.

**Out-Patient Department (Clinics)**—This Hospital main-

tains a complete Out-Patient Service Department with the following clinics in active operation:

Surgery  
Dressing Clinic  
Vascular Disease  
Tumor Clinic  
Fractures  
Orthopedics  
Plaster Room  
Obstetrics  
Post-partum  
Gynecology  
Male Urology  
Female Urology  
Special Therapy  
Obstetrics—Special Therapy  
Eye  
Eye-Refractions  
Ear, Nose and Throat  
Dentistry  
Dentistry (House  
Medicine  
Metabolic  
Cardiac  
Neuropsychiatric  
Pediatrics and Immunization  
Infant Feeding and Immunization  
Dermatology  
Allergy  
Tuberculosis  
Clinic Cystoscopy  
Pasteur Clinic

During the past year, 275,935 patients were cared for in the Out-Patient Department of this Institution.

**Pathology Department**—The Pathological Department is one of the most important departments in the Hospital as more and more doctors are becoming dependent upon laboratory examinations in order to establish diagnoses and as a guide in the treatment of their patients. This department has been seriously affected by loss of technical personnel. The individuals remaining in this Department, however, have willingly assumed additional burdens in order to carry on the functions of this very important department.

The Pasteur Institute is under the supervision of this Department. During the past year 7,650 injections of antirabies vaccine were administered and 476 animal brains were examined for rabies of which 158 or 33% were positive. This reveals a marked improvement in the rabies situation over last year. There still remains a very deep reservoir of rabies in the animal population as evidenced by these statistics.

**Anesthesia and Gas Therapy Department**—Under the supervision of Dr. John Adriani, a nationally known anesthetist, this department has reached a high state of efficiency and anesthesia accidents have been reduced 10

a minimum. All modern methods of anesthesia are being used, including general inhalation anesthesia of various sorts, spinal anesthesia in its various forms, intravenous and local anesthetics and nerve blocking or regional anesthetics. This department has been approved for a 3-year residency in anesthesia and doctors are being trained as anesthetists. The Charity Hospital School for Nurse Anesthetists, in cooperation with the Anesthesia Department, trains each year from 25 to 30 nurses who are graduated as approved nurse anesthetists.

**Blood Bank**—This is a department recently organized in this Institution and is divided into the local blood bank for use by patients in this Institution, and the mobile unit which goes throughout the State of Louisiana for the purpose of collecting blood for donors assembled at various locations. The blood is then returned to this Hospital for processing into blood plasma. A portion of the plasma is sent back to these communities for their use and the remaining portion is stored in this Hospital for use in any emergency throughout the State of Louisiana or by the armed forces of our Government should they need it.

**Electroencephalograph Department**—This department has continued to function in a most satisfactory manner under the direction of Dr. Walker Thompson. The services rendered by this department have been of material aid in diagnosing difficult brain conditions.

**Lung Station**—This department has functioned throughout the year and has been of great assistance to our physicians in evaluating those patients who are in need of chest surgery, as well as in checking the results of such surgery. Dr. J. H. Seabury has rendered a very fine service in this department.

**Personnel Department**—This department is under the very competent supervision of Mrs. Virginia Waldo. The personnel policies of this Hospital are set up and operated under the rules and regulations of the State Civil Service Department. Numerous conferences have been held with Mr. Willard E. Parker and other members of his department. The matter of recruiting acceptable personnel in adequate numbers has been extremely difficult during the past year. This has been especially true in classes in which professional or technical training is the requirement for employment. No solution of this problem can be expected until the cessation of hostilities.

**Dietary Department**—On July 1, 1944, the School of Dietetics in this Hospital began operations and on June 30, 1945, eight students completed the course in dietetics and were awarded certificates of graduation. This is the only school of its kind in the deep South. Full approval of this school by the American Dietetics Association was granted on February 17, 1945.

A nutrition clinic was organized in June of 1944 for the purpose of supplying dietary advice to out-patients when requested by doctors. This is most necessary in many diseases and during the past fiscal year, 10,858 pa-

tients were interviewed and instructed in this clinic. During the past year, 4,030,693 meals were served by this department, or a daily average of more than 11,000 meals. In addition the formula room prepared special formulae for 37,981 babies. This year has found food and equipment costs still rising and provisions very difficult to obtain. By means of careful supervision, food substitutions, when necessary, and through the cooperation of the various departments of the Hospital, our patients' needs have been met.

Anyone charged with the responsibility of planning meals and providing food for even the modest home can fully appreciate the task which confronted Sister Euphemia in such a tremendous undertaking. To say that she did a remarkable job during this period of acute shortage of food would be putting it mildly. Both she, and the Purchasing Department, under Mr. August Lestelle, are to be congratulated.

**Purchasing Department**—On July 1, 1944, the Governor's Executive Order No. 3 became effective. This Executive Order authorized this Hospital to provide materials, supplies, equipment and contractual services and to make payment therefor through employees at this Hospital designated jointly by the Director of Finances and the Director of the Hospital, provided that all transactions operate under procedures and standards prescribed by the Director of Finance and subject to his supervision and control. It was necessary for the Hospital to employ additional personnel in order to comply with the regulations of the Department of Finance and in order to educate our vendors in the new procedures necessary. At first this caused considerable confusion and some resentment among the vendors; however, this has been ironed out and our transactions are now being handled in a manner satisfactory to our vendors.

The Hospital had the misfortune of losing Mr. August Lestelle, Purchasing Agent, during the past year. Mrs. Ann Miller Yates was named Acting Purchasing Agent during the remaining portion of the year.

**Housekeeping Department**—This department, which is charged with the enormous task of housekeeping throughout the Institution, has devoted its activities during the past year to the care of the buildings and to the comfort of our patients. Special emphasis has been placed on the repair of worn-out linens which have been extremely hard to obtain. Sister Clarisse has kept the buildings spotlessly clean despite difficulties in procuring labor to do this work.

**Pharmacy Department**—This department, under the able supervision of Mr. A. P. Lauve, is actually far more than a hospital pharmacy, as it is a large manufacturing department saving the State of Louisiana thousands of dollars through the manufacture of drugs and pharmaceuticals. For instance, vitamins are manufactured in this department, and all hospital liquids for intravenous use are also manufactured. The cost of these two items alone, if purchased on the open market, would far exceed the cost of operating this department. The introduction

of new drugs, such as sulfonamides and penicillin has brought new problems. The cost to this Institution of penicillin alone is approximately \$3,000.00 per month.

**Classes for Convalescent Children**—The Hospital maintains under the supervision of the Orleans Parish School Board an approved educational program for those children who are confined within the Institution. From 9 A.M. to 9 P.M., each day, ambulatory cases attend classes and receive credit from public and parochial schools for this attendance, thus the education of our children is not interfered with and they are enabled to keep up with their school work during their stay in this Hospital. During the past year, 1054 children were enrolled in these classes under the very able supervision of Miss Thelma Klein.

**Charity Hospital Guild**—During the past fiscal year, under the able leadership of Mrs. Nora Gilmer, President, this devoted group of women, who were all volunteers, prepared and delivered 4,313,064 hospital dressings. This represents an enormous saving to this Hospital and we wish to express our gratitude to the members of the Charity Hospital Guild.

**Volunteer Organizations**—The Charity Hospital gladly acknowledges its appreciation and gratitude to the following volunteer organizations for their work in behalf of our patients.

American Red Cross  
Gray Ladies  
Nurses Aids  
American Society for the Control of Cancer  
Surgical Dressing Division  
Boy Scouts of American  
Dibert Community Volunteer Service  
Episcopal City Missionary Society  
Gauze Project  
Girl Scouts of America  
The Guild Room Project  
Junior Wacs  
Lakeview Botany Guild  
Nazarene Society  
St. Margaret's Daughters

A beautiful tribute was paid to our Sister Stanislaus by the people of New Orleans when she was selected as the recipient of the Times-Picayune Loving Cup. Sister Stanislaus is known, far and wide, as New Orleans' most beloved woman. She has devoted a lifetime to the service of the poor of this community and State. The poor of Louisiana can never properly express their gratitude to this little woman who has served them for more than sixty years. The example set by her has been a constant source of inspiration to all with whom she has come in contact—thousands of doctors, nurses, and others, whose lives have touched hers, have been enriched by such contact. Her many admirers are very happy because of this well deserved public acknowledgement and tribute which was paid to Sister Stanislaus.

The Hospital authorities wish to express their appreciation to the Honorable James H. Davis for the cooperator

Sister  
Stanislaus

Acknowledgments

tion which he has extended to us throughout the year.

We wish to express appreciation to the Honorable Robert L. Pettit, Director of the Department of Institutions, and the Honorable James S. Reily, Director of the Department of Finance, and the members of their Staffs for the cordial relationships which have existed between these departments and this Hospital, and for the continuous interest they have shown in the affairs of this Institution.

**Board  
of  
Administrators**

Obviously, the administration of an institution of such size as the Charity Hospital is a gigantic task. This could not have been accomplished without the very able advice and counsel of the members of the Board of Administrators who spend many hours of their time each week working with your Director and your Vice-President. The Finance Committee, under the Chairmanship of Mr. Fred S. Weis, and of which Mr. W. J. Kross and Mr. John X. Wegmann are members, assumed a very important and heavy responsibility in the administration of the financial affairs of this Institution.

The Medical Committee, of which Dr. E. J. Richard was Chairman, and Mr. Charles A. Farwell, Mr. Fred S. Weis, Mr. Walker Saussy, and Mr. W. J. Kross were members, coordinated their efforts with those of the doctors and the two medical schools so that the operation of these departments were conducted smoothly and efficiently.

The House Committee, under the Chairmanship of Mr. C. P. Fenner, Jr., and of which Mr. W. J. Kross and Mr. Charles A. Farwell are members, supervised the maintenance and repairs and new projects in the way of building construction undertaken by us during the past year and as the foregoing report will indicate, did a splendid job.

We are extremely pleased to report that the operation of this vast institution has functioned very smoothly during the year and we hope that the effort which we have put forth in the administration of its affairs will meet with your approval and appreciation.

Appreciation is expressed to the members of the Board of Administrators of this Hospital, who have given unstintingly of their time, and who aided and counseled the officials in the operation of the institution—to the Sisters of Charity who have continued their unselfish duties—to the doctors and the nurses, and to all of the personnel of this Institution, who have cheerfully carried the additional burdens imposed upon them by the conditions under which we have been forced to work.

Respectfully submitted,

L. G. RIECKE,  
Vice-President,  
Board of Administrators,  
Charity Hospital of Louisiana  
at New Orleans

O. P. DALY, M. D.,  
Director

## CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

Dr O. P. Daly, Director  
Charity Hospital of Louisiana  
New Orleans, Louisiana

August 15, 1945

Dear Dr. Daly:

The Accounting Department herewith presents the report on the financial condition of the Charity Hospital of Louisiana at New Orleans for the fiscal year ending June 30, 1945.

The Report is composed of the following Exhibit and Schedules:

Exhibit	I	Balance Sheet
Schedule	I-A	Statement of Income and Expenditures
Schedule	I-B	Surplus and Deficit Account
Schedule	I-C	Visitors Food Service Operations
Schedule	I-D	Unexpired Insurance Premium
Schedule	I-E	Hospital Buildings
Schedule	I-F	Hospital Equipment and Furnishings
Schedule	I-G	Capital Outlays
Schedule	I-H	State-Wide Blood Plasma Program
Schedule	I-J	Federal Grant-U. S. Cadet Nurses Fund
Schedule	I-K	Federal Grant-Basic Nursing Program
Schedule	III-A	Hospital Miscellaneous Income for Fiscal Year
Schedule	III-B	Miscellaneous Income—June, 1945
Schedule	IV	Summary—Operating Expenses
Schedule	V	Statement of Operating Expenses
Schedule	VI-A	Hospital Admissions, Discharges and Patient-Day Costs
Schedule	VI-B	Comparative Statement of Monthly Cost of Operation
Schedule	VI-C	Admissions by Parishes
Schedule	VI-D	Number of Employees on Payroll

Respectfully submitted,

L. A. MILLET,  
Chief Accountant

LAM:MSH

## ANNUAL REPORT PERSONNEL DEPARTMENT

July 1, 1944—June 30, 1945

Dr. O. P. Daly, Director  
Charity Hospital of Louisiana  
New Orleans, Louisiana

Dear Dr. Daly:

The matter of recruiting acceptable personnel in adequate numbers has been extremely difficult during the past year. This has been especially true in classes in which professional or technical training is a requirement for employment.

In most Departments of the Hospital it was possible to reorganize the work so that untrained personnel working under the direct supervision of a trained employee could be utilized.

Because of the physical size of the Hospital and the great number of services offered, it was found advisable to draw up a handbook for new employees in order to orient them to the Hospital more rapidly.

This handbook contains a brief history of the Hospital; information pertaining to Civil Service status, personnel records, identification cards, transfers, promotions, resignations, dismissals, pay days, hours, the lunch rooms, holidays and vacations. It gives the employee instructions as to what to do if he is hurt on the job, feels the need of medical attention, is ill at home and unable to report for work. A list of Department Heads and the name of the Department supervised by each is shown. The location of each unit of the Hospital is described.

New employees report that they find the handbook helpful.

We wish to thank the Director of the Hospital and Department Heads for their willingness to revise work schedules in order to utilize available personnel.

Respectfully submitted,

VIRGINIA B. WALDO,  
Personnel Director.

## SISTERS' DIVISIONS

July 1st, 1944

To the Board of Administrators and Doctor O. P. Daly, Director  
Charity Hospital of Louisiana at New Orleans.

Gentlemen:

The departments conducted by the Sisters have suffered somewhat of a setback during the past year because of war conditions. Despite every effort to keep standards on a high level, circumstances beyond our control forced us to accept conditions and practices easily recognized as inferior to those of previous years.

Many of these conditions came about because of our inability to employ or retain competent personnel. Some were due to excessive costs of supplies and materials, and others arose out of the impossibility of replacing worn out equipment.

We realize that an institution such as this could not compete with prevailing wages in war industries, but a raise in the minimum salary and periodic salary increases for meritorious service would have done much to prevent the turnover of personnel so detrimental to good service. A fair living wage is due all of our employees, but we have had much reason to deplore the salaries offered to our subsidiary group. We are assured of your sympathy with this problem and we are aware, too, that the reduction in our appropriation is the main reason for our difficulty during this past fiscal year. However, we face another year on a reduced budget with apprehension. We can only trust and pray that some means will be found to ameliorate the conditions now prevailing.

The reports of the Sisters' Divisions follow. We take this opportunity to thank you for your constant solicitude and interest in our behalf. We also wish to express the gratitude of all of the Sisters toward the department heads, the medical staff and all personnel in the hospital for their continued cooperation and help.

Respectfully submitted,

SISTER STANISLAUS,  
Director, Sisters' Divisions.

## NURSING DEPARTMENT

To the Board of Administrators and Doctor O. P. Daly, Director, Charity Hospital of Louisiana at New Orleans:

We are happy to present the annual report of the Nursing Department for the year ending June 30, 1945.

In reviewing the activities of the past fiscal year, we feel that there is very little to relate that is new or different. We have passed through the crisis of the war but we are still acutely in need of personnel, and many new projects must wait until nurses and other trained workers again become available.

The report of the Nursing Department will be divided into the Nursing Service section and the School of Nursing section.

### NURSING SERVICE DIVISION

#### Nursing Situation in the Hospital

The care of our numerous patients has presented overwhelming difficulties during the past year because of the continued loss of graduate nurses. Our total graduate nurse staff as of June 30, 1945 is 247. Many of these nurses are holding teaching and supervisory positions, and only a few general staff nurses are left to give stability to our nursing service program. Patients are cared for almost entirely by student nurses. We are proud of the service rendered by our students during this trying period, however, they are following an accelerated program and some of the departments have suffered a great deal because of the rapid turnover of nurses.

Very splendid service has been rendered by volunteers, and we are happy to call attention to the 24,913 hours of service rendered by the 152 Volunteer Nurses' Aides sponsored by the New Orleans Red Cross Chapter. The work of the nurses has been supplemented by that rendered by these aides, and our tribute of gratitude to them is very deep and sincere.

#### Opening of Neuropsychiatric Unit

We have long recognized the need for a special unit for Neuropsychiatric patients, who have always presented great difficulties on the general floors. These patients formerly occupied four wards, with approximately 40 beds, and there was a constant problem of over-patients on these wards.

Beginning on June 7, these patients were transferred to a Neuropsychiatric Unit consisting of eight wards, located in the center wings of third and fourth floors, and having a total capacity of 84 beds. Here the patients can be carefully supervised, and occupational and recreational therapy can be planned for them. The unit is under the direction of Sister Juliana, who has had special work in Neuropsychiatric Nursing. During the first part of June, two head nurses went away for supplementary work in Neuropsychiatric Nursing, in order to be able to assist in supervision and management of the unit.

While it is not yet possible to execute in a small unit all forms of therapy needed by the patients, we believe that a forward step has been made toward the more efficient and more modern administration of Neuropsychiatric care.

To make room for the new Neuropsychiatric Unit, it was necessary to reopen several wards on the seventh floor for male genito-urinary pa-

tients. Since male E. E. N. T. patients were already occupying wards on that floor, there are now only two wards, with about fifty beds each, remaining vacant on the seventh floor.

#### Plans for Special Infant Unit

In conjunction with the Louisiana State Board of Health, the Children's Bureau, Department of Labor, Washington, is making plans for the establishment in the South of a center for post-graduate training in the nursing of premature infants. Charity Hospital was asked to participate in this program because of the number of premature infants we have at all times. Plans include the special preparation of supervisory staff members. The Children's Bureau and the State Department of Health are providing scholarships to send nurses from our staff to recognized centers of training, for advanced courses in the nursing of premature infants.

Additional equipment has been ordered for the Special Infant Unit. We are waiting for 28 Gordon-Armstrong Incubators and 2 Minnesota Ther-Mo-Cribs. Individual heating and humidifying apparatus and additional plumbing have been installed in the unit.

It is planned that the course in premature infant nursing will be initiated when our unit is able to meet the standards set up by the Children's Bureau. Our greatest problem at the present time is the lack of trained personnel.

### SCHOOL OF NURSING

#### Statistics

We are giving below comparative figures for the School of Nursing to show the tremendous increase in the size of the school during the war.

STUDENTS IN THE SCHOOL OF NURSING	1941	1945
Charity Hospital Students.....	185	448
Affiliating Students.....	47	177
Post Graduate Students.....	10	3
Anesthesia Students.....	21	24
Students in five-year Program.....	12	20
Senior Cadets from Other Hospitals.....	—	6

#### SCHOOLS AFFILIATED WITH CHARITY HOSPITAL SCHOOL OF NURSING

Schools Located in State.....	2	10
Schools Located Out of State.....	9	19

#### ADMISSIONS AND WITHDRAWALS

Admissions to School of Nursing.....	99	230
Withdrawals from School of Nursing.....	91	139

#### COURSES COMPLETED

Students Graduated.....	66	80
Anesthesia Students Receiving Certificates.....	31	36
Students Receiving Degrees from L. S. U.		
Department of Nursing Education.....	7	1

#### Faculty Growth

Because the student body is so greatly increased, the faculty and administrative staffs of the school and the Nursing Service Division were of necessity increased in proportion. The full time faculty and administrative personnel now number thirty-six, of whom seven are Sisters.

**Clinical Teaching Program**

The clinical teaching, or ward teaching program, as it is commonly called, was greatly strengthened during the past year because of the appointment of several clinical instructors who devote their entire time to the teaching of students. While they teach their specialties in the classroom, most of their time is spent in teaching ward classes and in follow-up work with students on the patient floors. The purpose of the ward teaching program is to assist the students in applying to the actual practice of caring for patients, the principles which they learn in the classroom and the laboratory. This will result, we believe, in a superior quality of nursing care.

**Participation in the Cadet Nurse Corps**

Ninety-six per cent of our students are members of the U. S. Cadet Nurse Corps. We received from the federal government during the past fiscal year a total of \$215,667.40 for the education of the Cadet Nurses. Miss Elsie Berdan, Nursing Education Consultant of the U. S. Public Health Service, made a survey of the School of Nursing this spring, reporting favorably on our program.

According to the provisions of the Cadet Nurse Corps, our cadet students are privileged to request a transfer to one of the Federal hospitals for the senior cadet period, which is their last six months in training. Fifty per cent of each of our classes has been released for this purpose. The other cadets remained with us, and a few senior cadets from other schools transferred here for their senior cadet period. As senior cadets prove to be in actual practice comparable to graduate nurses in value of service, we used them to advantage during our shortage of graduate nurses.

**Appreciation**

We wish to express our sincere gratitude to the members of the Board of Administrators, to Doctor Daly, and to Dr. Pullen for their constant interest in the affairs of the Nursing Department and for their assistance in working out our problems. We are also grateful for the co-operation and assistance rendered by the heads of other departments, the medical staff, and the members of the teaching staffs of the Louisiana State University School of Medicine and the Tulane University School of Medicine.

Respectfully submitted,

## ANNUAL REPORT OF THE DIETARY DEPARTMENT

July 1, 1944 — June 30, 1945

Director and Administrative Dietitian: Sister Euphemia

Administrative Assistant: Mildred R. Darnell

Therapeutic Assistant: Madge Myers

## Staff Dietitians:

Mabel Bersuder	*Shirley Johnson
**Audrey Beyer	Marilyn L. Larson
Betty J. Blauert	E. Jeanne LeTourneau
*Husta Amis Crossett	*Ruth Abramson London
*Ruth E. Curtis	Barbara A. McCurry
*Charlotte Drake	*M. Berniece Overton
Wilma Hawkins	*Mary M. Rooney
*Constance Hayes	Arlowin W. Wall
*Mable Taylor Jennings	

To the Board of Administrators and Doctor O. P. Daly, Director,  
 Charity Hospital of Louisiana at New Orleans.  
 Gentlemen:

The Annual Report of the Dietary Department for the fiscal year beginning July 1, 1944 and ending June 30, 1945, is herewith respectfully submitted:

## ACTIVITIES AND ACCOMPLISHMENTS

The first class of ten Dietitian Interns was enrolled in Charity Hospital July 1, 1944. The course was inspected on January 13th and 15th by Miss Lucille Refshauge, who made her report to the Approval Board of the American Dietetic Association. Full approval was granted by this Board on February 17, 1945. The eight Interns who completed the Course on June 30, 1945 were presented certificates by the Hospital, and all are eligible for membership in the American Dietetic Association.

A small pamphlet concerning the Dietetic Internship was printed for prospective Interns. Pins were selected for graduate Charity Hospital Dietitians.

A nutrition clinic was organized in June, 1944, for the purpose of supplying dietary advice to out-patients when requested by a doctor. Subsequent appointments for the nutrition clinic are made by the dietitian when follow-up instruction is required. In addition, diabetic and obstetric patients are given routine and special nutrition advice in those clinics.

The total number of patient interviews in the nutrition clinic from July 1, 1944 through June 30, 1945 is 10,858.

\*Resigned

\*\*Military Leave

There has been a general increase in meals prepared for patients and personnel throughout the hospital. Comparative figures follow:

	1943-1944	1944-1945
Personnel Meals .....	1,467,194	1,510,776
Patient Meals .....	2,060,706	2,167,920
Delgado Building Meals.....		58,594
 TOTAL MEALS .....	3,527,900	3,737,290
Special Diets .....	310,812	293,403

In addition, the Formula Room prepared formulae for 37,981 babies.

#### APPRECIATION

In spite of war conditions, a few much needed pieces of small equipment were acquired during the year. Two dishwashing machines, pantry tray trucks, and other much needed minor equipment were procured and are much appreciated.

This year has found food and equipment costs still rising, and provisions very difficult to secure. The combined efforts of the Purchasing Department, Personnel Department, Dietary Department and the Administrative Office, have made it possible for us to maintain our department functions at a remarkably high level during this critical time. We are very grateful to all those who have assisted.

Ventilation of the floor pantries has been a real benefit to the department, and we are grateful to all who helped make this possible.

We wish to express our appreciation to the Director, the Board of Administrators, and the medical staff for the help extended to us throughout the year. We are especially grateful to the doctors of both Tulane University and Louisiana State University medical schools, who gave so freely of their time in instructing the dietitian interns, as well as to the other departments who also lectured to the students, especially the Nursing Service, Housekeeping Department and Social Service Department. We also wish to thank all departments for their cooperation.

Respectfully submitted,

SISTER EUPHEMIA, Director  
Dietary Department

To the Board of Directors and Doctor O. P. Daly, Director of the Charity Hospital of Louisiana at New Orleans.

Gentlemen:

The annual report of the Housekeeping Department for the fiscal year beginning July 1, 1944 and ending June 30, 1945 is herewith submitted.

The activities for the past year in the Housekeeping Division have chiefly been centered on efforts to improve personnel management and methods of cleaning. The turnover of personnel has been considerably reduced by requesting new employees to give one day voluntary service before they are employed. In this way maids know what is expected of them when they accept positions and seem better satisfied, and we also have the opportunity of observing whether they have the ability to follow directions and are physically able to do the work.

New floor cleaning compounds, which are not soaps, have been introduced, and these have saved a great deal of floor mopping labor. With the use of this material no soap film is left and built up on the floors and around baseboards. Formerly, vigorous periodic scrubbing was required to remove the accumulated film. The improvement is particularly noticeable on terrazzo floors, which are now easily mopped clean and remain clean longer. This method has also saved a great deal of wear on floor machines because the compounds readily dissolve wax, and de-waxing is done by merely mopping the floors instead of scrubbing them with electric machines.

Two new electric floor polishing machines were secured for polishing waxed floors, and two new Electrolux cleaners were purchased for the Doctors' and Nurses' Residence.

About 230 cotton felt mattresses from ward units were renovated and 204 new mattresses were purchased, costing \$3,530.00. New blankets, 429 in number, were purchased, costing \$2,415.00.

Insect extermination continues to be done by contract with the Orkin Exterminating Company. An improved system of follow-up through Housekeeping Office has brought about better results in this work. About 117 beds were fumigated in the fumigating vault in the past year.

Scarcely any wall washing has been done because of lack of personnel for this work. The window washing contract has been renewed with the National Window Cleaning Company and the work is satisfactorily done.

A series of instructions on the fundamental principles and methods of Housekeeping has been introduced for the student dietitians in the Dietary Division, in order to prepare them for positions in small hospitals where they may be called upon to supervise Housekeeping in connection with dietary service.

In the Salvage Division, \$1,274.54 worth of salvage material was sold to salvage dealers.

#### LINEN AND SEWING SECTION

This division has not been able to give desirable service for good patient care, because there has been lacking an adequate supply of linen. About 13,000 new sheets were needed to replace worn out sheets, but only about 4800 were obtained and some of these had to be used to make up garments. It has been very difficult to get sufficient material by the yard to make gowns for patients, doctors, and nurses.

Throughout the year it has been necessary to issue immediately to the wards the linen delivered from the laundry just off the pressers. This was a source of much difficulty for the Laundry Manager when at times he could not arrange to wash it as promptly as it was needed. The work in the linen room was also delayed because the morning supply could not be estimated and distributed until all the linen from the laundry had been delivered. The additional wear on the linen has doubled the amount of mending that must be done daily. Heretofore, there have been three seamstresses on full time mending. This past year two additional seamstresses were employed to work on mending. It must be remembered, too, that some of the cotton materials are manufactured now with a lower thread count, which also reduce wearing quality. Thus, the additional wear on the linen accounts also for the need of a greater output. Requisitions for new materials by the various departments have increased more rapidly than material can be obtained or made up.

In view of the present situation we suggest that the purchasing of ready-made hospital gowns be considered, as it seems impossible to get sufficient material to make the number of gowns needed for such a large institution. Furthermore, the gown manufacturing companies have good quality materials which are not available to the hospitals. The immediate need for action in this matter is urgent at this time, in order to keep ward units and operating rooms supplied with the necessary linen.

We wish to express our sincere appreciation to the Director and his Administrative Staff, and to the Board of Directors for the generous assistance which has been given to the Housekeeping Division during the past year. We gratefully acknowledge also the interest and cooperation we have received from all Department Heads.

Respectfully submitted,

SISTER CLARISSE

Director of Housekeeping Department

## REPORT OF THE SOCIAL SERVICE DEPARTMENT

July 1, 1944 through June 30, 1945

## STAFF

During the year the turnover in the department was approximately equal to that of the previous fiscal year. In the entire staff there were 14 resignations and 4 requests for leave: 9 resignations and 3 requests for leave in the professional staff, and 5 resignations and 1 request for leave in the clerical staff. There were 14 replacements: 9 in the professional staff and 5 in the clerical staff. There was one promotion in the professional staff: from Medical Social Worker I to Medical Social Worker II. One position, Medical Social Worker II, was abolished because it had been vacant 90 days prior to 12-31-44. It had never been possible to fill this position because only a part time salary was available.

During the year raises were secured for all but three of the workers; the last three raises were not approved because of lack of funds.

## WORK OF THE DEPARTMENT

During the year the department carried out its two functions: to provide case work services to patients under treatment in Charity Hospital wards, clinics, accident and admitting departments, and to determine eligibility of applicants for free medical care.

## Case Work Services

**Service Assignments**—In 1943-44 it had been possible to eliminate the general clinic service and divide most of the services on a ward and clinic basis. In 1944-1945 the division was carried a step further: the services were divided into Tulane and L. S. U. instead of white and colored. This proved helpful for it not only tended to give the workers continuity with their patients and a feeling of being part of a team with the medical staff, but it also gave the workers experience with both white and colored, male and female patients. Work with Negro patients only was frustrating because of lack of resources in the community for Negroes.

During the year that one supervisor was on leave, it became more and more apparent that the department could not function adequately with three supervisors. It was decided, therefore, that one member of the case work staff would be promoted to the supervisory staff and one of the service assignments would be divided among the supervisors. One advantage of such an arrangement was that it gave the supervisors actual contact with patients.

**Case Load**—During the year the workers handled 32,709 cases or an average of 2725.8 cases a month as shown by the following table:

July, 1944	2350
August, 1944	2493
September, 1944	2237
October, 1944	2316
November, 1944	2616
December, 1944	2696
January, 1945	2539
February, 1945	2640
March, 1945	2786
April, 1945	3286
May, 1945	3555
June, 1945	3195
TOTAL	32,709

This total of 32,709 cases does not include all of the services rendered patients by the department since it would be impossible to keep a statistical count of all services given.

#### ADMITTING PROGRAM

This is the third year that the social admitting system has been in effect. The following table shows the work of the Hospital Intake Unit for the past two fiscal years:

MONTH	Patients Interviewed			Patients Found Ineligible		
	Number 1943-44	Number 1944-45	Number 1943-44	Number 1944-45	Percent 1943-44	Percent 1944-45
July .....	1686	1565	380	499	22	31
August .....	1652	1625	439	697	26	42
September ....	1132	1406	330	586	28	41
October .....	1492	1328	305	585	25	44
November .....	1468	1318	297	530	20	40
December .....	1329	1094	390	411	29	37
January .....	1268	1213	307	460	23	37
February .....	1446	1116	279	449	19	40
March .....	1610	1016	396	446	24	43
April .....	1302	1655	473	585	34	35
May .....	1476	1569	415	624	29	39
June .....	1527	1440	462	471	30	32
<b>TOTAL .....</b>	<b>17,388</b>	<b>16,345</b>	<b>4,473</b>	<b>6,343</b>	<b>28</b>	<b>38</b>

\*The figures for March, 1945 are low as statistical material compiled by a volunteer aide was lost.

An analysis of the work of the Hospital Intake Unit for the year 1944-45 has shown a steady increase in the number of patients found ineligible for free medical care. In 1942-43 the percentage of ineligibility was 12%, in 1943-44 28% and for the year 1944-45 38%, the latter percentage being triple to that of the total for 1942-43, when the unit was created.

This is probably due in part to the fact that economic conditions have improved in the state as a result of the war, and in part to the fact that the workers have become more skilled in interviewing and weeding out ineligible patients.

During the year 22 ineligible patients were admitted because it was impossible for them to secure accommodations in private hospitals. The same number of ineligible patients were admitted to the hospital during the previous fiscal year for the same reason.

#### STUDENT TRAINING PROGRAM

Twenty-seven students from the Tulane School of Social Work were placed in the department during the summer, fall and spring semesters. This was five more than had been placed during the previous fiscal year. Tulane was responsible for the supervision of 17 students while the department was responsible for the supervision of 10, which is approximately the same number of students supervised last year by workers connected with the department.

During the year one of the supervisors who had been a field work instructor left the department and it was necessary for one of the staff workers to take students in her place.

Besides the program with the Tulane School of Social Work, the department continued to participate in the educational program of the

Charity Hospital School of Nursing and the Tulane University Department of Preventive Medicine.

### STAFF DEVELOPMENT

#### Venereal Disease Project

The American Association of Medicine Social Workers set up a special committee to study medical social factors in a venereal disease setting. The department was asked to participate in the study which involved answering a questionnaire and analyzing a series of cases.

#### Chronically Ill

The Child Welfare and Community Health Association asked the co-operation of the department in making a survey of the chronically ill in New Orleans. Information was being compiled in the hope that it could be presented to the 1946 Legislature when measures for the care of the chronically ill were to be introduced.

#### Statistics

On the basis of the findings of the volunteer committee of five which tried out the new statistics devised by the United Hospital Fund of New York on a three months experimental period, the staff decided to adopt the new form because it lessened the amount of work involved in compiling the statistics as well as because it afforded a better case count and made the workers more aware of their recording or lack of recording.

#### Recording

In November, 1944 a staff committee completed an experiment in recording. The committee had two assignments: 1) to study the use of an experimental outline for recording, and 2) to attempt to formulate a statement of standard practices related to recording for the department. The outline for medical social recording which had been devised for the use of the Tulane School of Social Work students was utilized as the basis for the study. As a result of the study the staff agreed that the new outline should be adopted for use in the department and that an attempt should be made to have at least one-third of the caseload in the form of narrative recording.

#### Staff Meetings

Staff meetings which were held every other week included discussions of statistics, recording, programs of other organizations which might be helpful to the department.

#### Supervisory Program

Conferences were held with the supervisory staff weekly. At these meetings workers presented difficult cases for which no solution had been found. Current social work literature was discussed and administrative problems were brought up.

#### Staff Council

The staff council explored the problem of workers coming in late, of workers not attending staff meetings and of failing to belong to professional organizations as well as discussed the basis on which workers were selected for raises.

**VOLUNTEERS**

The department continued to depend on volunteers to handle the intake desk, to help with typing and to work as case aides on certain services.

**American Red Cross**

Gray Ladies were assigned to the intake desk; they assisted with filing and worked as case aides on the obstetrical, surgery and metabolic services. Throughout the year a staff assistant reported regularly three times a week to answer the telephone.

**Office of Civilian Defense**

Volunteers from the Office of Civilian Defense were assigned to the clinic Social Service office to answer the telephone and to act as receptionist.

Since the personnel cut in 1942, the department has depended heavily on volunteers to make up the reduction in staff incurred at that time.

A staff committee which is responsible for orienting, training and assigning volunteers has been set up and is now functioning.

**EXPENDITURES**

The following shows the disbursements of the Social Service Department for the past fiscal year:

Patients' Fund .....	\$ 485.35
Transportation-Patients .....	578.79
Home visits—Students .....	43.09
Sundry .....	838.38
	<hr/>
	\$1,945.61

**Patients' Fund****Transportation:**

Paid by Patients.....	\$ 166.42
Paid by Agencies.....	134.59

**Sundry:**

Amounts dues—Paid by Patients.....	68.43
Amounts due—Paid by Agencies.....	8.43
Prescriptions—Paid by Patients.....	1.95
Prescriptions—Paid by Agencies.....	5.43
Appliances—Paid by Patients.....	28.76
Appliances—Paid by Agencies.....	13.19
Glass Eyes—Paid by Patients.....	50.00
Insurance Blanks—Paid by Patients.....	.50
Shoes & Repairs—Paid by Agency.....	7.65
	<hr/>
	\$ 485.35

**Weil Convalescent Fund**

During the year the Weil Convalescent Fund was used as follows:

	Number of Patients	Amount Expended
White Patients .....	2	\$20.00
Colored Patients .....	6-	\$55.00
Total .....	8	\$75.00

**Stauffer-Eastwick Fund**

In April, 1945 the department was notified that interest from the Stauffer-Eastwick Fund was available as a bequest of George Spencer Eastwick, his wife and sister. Under the provisions of the will the fund "shall be applied to the temporary relief and assistance of worthy white male or female patients of Charity Hospital, after their discharge therefrom, who may be wholly or partly unable to pay their expenses, until such time as they regain sufficient health and strength to resume or take up regular occupations in life, with the distinct understanding that none of said income shall be expended upon incurable cases, or to create permanent pensioners, and that no assistance shall be extended from said Fund to any individual for a greater period of time than six months."

Requests for use of the Fund must be approved by the Director of the Social Service Department, Secretary-Treasurer of the hospital, Director of the hospital, and a member of the Finance Committee of the Board. So far the Fund has been used as follows:

Number of Patients	Amount Expended
3	\$61.00

**Insulin Fund**

During the year the Insulin Fund was used as follows:

Insulin purchased during period 7/1/44-6/30/45.....	\$ 343.57
Patients served.....	133
Cash balance as of 6/30/44.....	\$1801.34
Receipts 7/1/44-6/30/45 .....	0.00
Total Credits .....	\$1801.34
Expenditures 7/1/44-6/30/45.....	\$ 343.57
Cash balance as of 6/30/45 .....	\$1457.77

A total of 133 patients were given insulin from the available money known as the Lucius B. and Katherine E. Price Fund during the period 7/1/44 to 6/30/45. Of the 133 patients served 25 received insulin over a period of two to three months and 23 patients obtained insulin more than once during one month. This was necessary as no other immediate plan could be formulated whereby the needed medication could be secured by the patient group. When an adequate and workable budgetary plan could be evolved for the patient or the Department of Public Welfare issued a monthly grant, the use of the Insulin Fund was discontinued.

## WORK OF CHAUFFEUR

The following table shows the work of the chauffeur for the fiscal year:

Trips Made By Chauffeur	Total for Fiscal Year
Institutions, NOCH, Shelter Homes .....	508
Patients' Homes in New Orleans .....	1134
Coroner's Office .....	23

## TUBERCULOSIS STUDY

The following is the tuberculosis study for the past fiscal year.

## Reason for Remaining on Ward

Color	Number	Lack of DPW Funds		Lack of Custodial Care		Plans Made	Car- ried Over
		Boarding Days	Care Cost	Boarding Days	Care Cost		
Colored .....	16	278	\$ 601.68	707	\$1472.18	9	2
White .....	4	207	\$ 450.86	73	\$1590.04	2	2
<b>Total</b> .....	<b>20*</b>	<b>485</b>	<b>\$1052.54</b>	<b>780</b>	<b>\$3062.22</b>	<b>11</b>	<b>4*</b>

\*Discharge was cancelled on one patient, and four died.

In interpreting these figures, it must be borne in mind that they give only a partial picture of the administrative problem in relation to the custodial care of these patients. These figures cover only the patients who are officially discharged, and do not include many who are not treatable, but are not discharged because of lack of facilities for their care.

## RELATIONSHIPS WITH OTHER AGENCIES

## Department of Public Welfare

Since there had been some question as to whether or not the hospital could bring charges of abandonment in the Juvenile Court, this matter was cleared with the attorney for the hospital and it was agreed that when abandoned babies were in the care of the hospital, all available information would be referred to the Department of Public Welfare and that agency would refer the case to the attention of the Juvenile Court.

## City Department of Health

It was agreed that we would refer routinely to the City Department of Health for nursing care all children with rheumatic heart disease hospitalized at Charity Hospital.

**EXTRAMURAL ACTIVITIES**

A member of the supervisory staff was chairman of the Gulf District of the American Association of Medical Social Workers and attended the Executive Committee meeting of that Association in Chicago. A member of the supervisory staff participated in the program of one of the regional meetings of the State Conference of Social Welfare. A member of the supervisory staff served on the Council committee to study the needs of children in the community. The department was represented on various committees in the Council of Social Agencies including the Medical Social Work Section and the Executive Committee of the Health Division. Members of the staff served on the planning committee of the nursing section of the Health Division and the Labor Participation Committee.

**REPORT OF THE DEPARTMENT OF PATHOLOGY**

August 27, 1945

To the Board of Administrators and  
Dr. O. P. Daly, Director  
Charity Hospital of Louisiana  
New Orleans, Louisiana

Gentlemen:

I herewith submit the annual report of the Department of Pathology of Charity Hospital at New Orleans for the year closing June 30, 1945.

The Department wishes to express appreciation to the Director, to the Administrative Staff, to the Board of Administrators and to other Departments of the hospital for their cooperation and assistance.

We also wish to express appreciation to our Visiting Staff of Pathologists and Scientists from Tulane University School of Medicine and Louisiana State University School of Medicine for the faithful fulfillment of all responsibilities and obligations.

To my own professional, technical and secretarial staffs I am deeply grateful for their loyalty and untiring devotion to duty during this fourth most difficult year of war.

Respectfully submitted,

EMMA S. MOSS, M. D.,  
Director Department of Pathology

ESM: mc  
enc.

## FULL TIME STAFF

as of 6/30/45

## Medical:

Emma S. Moss, M.D., F.A.S.C.P., F.A.C.P., Director, certified American Board of Pathology: Pathologic Anatomy and Clinical Pathology  
 Emil E. Palik, M.D., F.A.S.C.P., certified American Board of Pathology: Pathologic Anatomy and Clinical Pathology  
 George F. Fasting, M.D., Bacteriologist  
 Philip Pizzolato, M.D., Assistant Pathologist  
 Ulysses Stoer, M.D., Resident in Pathology

## Technical Staff:

Esther McElwee, B.S., M.T. (ASCP) Acting Chief Medical Technologist  
 Elizabeth Maupin, B.S., M.T. (ASCP)  
 Patricia Sallas, B.S., M.T. (ASCP)  
 Dolores Fordham, M.T. (ASCP)  
 Mary D. McMullen, B.S., M.T. (ASCP)  
 Janis J. Smith, B.S., M.T. (ASCP)  
 Edma Pierce, B.S., M.T. (ASCP)  
 Lois Korzenovsky, B.S., M.T. (ASCP)  
 Hattie Thomas, B.S., M.T. (ASCP)

## Laboratory Helpers:

Ida Chung, B.S.	Audrey Raisbeck
	Nancy Coulson

## Secretarial and Clerical:

Margaret Carré, Secretary to Department of Pathology and Clerical Supervisor	
Rosalie Rogers	Amelia Brinkman
Sadina Bertucci	Sophie Halphen
Olga Bertucci	Ella Dominguez
Alene Womac, Morgue Clerk	
Robert Castner, Morgue Clerk	
(deceased 8/14/44)	

## Autopsy Assistants:

Estival Savoie	Louis Haack
----------------	-------------

## Custodial Workers:

Frederick Minor	Fannie Thomas
Olivia Knowles	Beatrice Allen

## Animal House Attendant:

Henry Bruser	
--------------	--

## INDEFINITE LEAVE OF ABSENCE FOR MILITARY DUTY

Maurice M. Rice, M.D., Pathologist	
William Rawlings, M.D., Resident in Pathology	
Joy Holm, B.S., M.T.	Jesse D. Perkins, B.S., M.S., Ph.D.
Tom K. Farris, B.S., M.T.	Edward Alana, Autopsy Assistant
Italia Birkinsha, B.S., M.T.	Albert Barousse, Autopsy Assistant
Walter Majewski, B.S., M.T.	Hunter Waltes, Autopsy Assistant
Monelle Smith, B.S., M.T.	James E. Chiles, Autopsy Assistant
Conan Millstein, B.S., M.S.	

## REPORT OF THE DEPARTMENT OF PATHOLOGY

July 1, 1944 — July 1, 1945

## DIAGNOSTIC LABORATORIES

Serology .....	72,675
Biochemistry .....	33,341
Bacteriology No. 1, including Central Laboratory for Contagious Unit	25,355
Bacteriology No. 2, Central Laboratory Tuberculosis Units .....	12,002
Hematology .....	8,320
Parasitology .....	22,103
Out-Patient Clinic Laboratory .....	41,004
Emergency Laboratory .....	33,373
Blood Typing and Matching (July and August) .....	11,281
Venereal Diagnostic Clinic .....	3,061
Basal Metabolic Laboratory .....	1,388
Friedman Laboratory .....	20
Total .....	263,932

With the continued depletion of technical personnel it has been necessary to institute measures to reduce the volume of tests performed by the Division of Diagnostic Laboratories. With the approval of the Administrative authorities of the hospital changes in routine procedure were made to effect this decrease.

1. Serology—Kline tests for syphilis are performed on all specimens and Kolmer complement fixation tests are used for confirmation and check. This has effected a 20.4% reduction.

2. Biochemistry—All special tests are on an appointment or quota basis. "Rush" determinations are accepted only after consultation with a member of the medical staff of the Department of Pathology. This has effected a 22.1% decrease.

3. Bacteriology—Practically the entire reduction of 2,026, or 5.1%, has been effected by a reduction in requests for unnecessary agglutination tests.

4. Out-Patient Clinic Laboratory—Reduced 23.4% by the elimination of non-essential tests and duplications.

5. Emergency Laboratory—Reduced 44.5% largely due to elimination of blood grouping and matching tests and Klines on donors. The greater part of this is now performed by the Blood Bank.

6. Blood Typing and Matching—All routine blood typing and matching was transferred to the Blood Bank on September 1, 1944.

7. Basal Metabolic Laboratory—Reduced slightly by accepting all requests on an appointment basis.

8. Friedman Laboratory—Reduced slightly by accepting requests on a consultation basis.

There were small increases in Hematology, Parasitology and the Venereal Diagnostic Laboratory.

The measures taken were effective in reducing the volume to the 1943-44 level. This still remains an extremely heavy work load for the individual personnel, since there has been considerable reduction in personnel over the same period.

## SURGICAL PATHOLOGY

Surgical specimens received and sectioned.....	7,666
Autopsies sectioned .....	897
Histopathological specimens completed .....	37,073

The number of surgical specimens received remains practically constant, there being 10 more for the present fiscal year than for the previous year. The specimens distributed according to service unit from which they arose were Tulane University 37.8%, L. S. U. School of Medicine 32.5% and Independent 28.7%. The hospital staff Pathologists are responsible for the Independent Unit. The hospital staff Pathologists continue to accept all consultations for frozen sections without regard for the unit from which they arise.

## PATHOLOGIC ANATOMY

Total deaths .....	2,394
Coroner's Cases .....	684
Autopsies on Coroner's Cases.....	136—19.8%
Bodies delivered to La. State Anatomical Board and Medical School Museums .....	52
Bodies available for autopsy .....	1,794
Total number of autopsies .....	904—50.4%

There were 45 or 4.6% fewer autopsies performed in the previous fiscal year. This was due for the most part to periods of acute personnel shortage and not to any lack of effort on the part of the staff in attempting to secure permission for necropsy. It was necessary on some occasions to release bodies on which permission for autopsy had been granted due to this unfortunate situation. Both the total number and the percentage can be appreciably increased as soon as the present war emergency is over and personnel is again available.

## PASTEUR INSTITUTE

Total number animal brains examined for rabies.....	476
Negative .....	298
Positive .....	158—33%
Unsatisfactory .....	20
Total patients received in Pasteur Clinic.....	1,933
Treated .....	422
Observation .....	1,511
Total number of injections of anti-rabies vaccine administered.....	7,658

There has been a marked improvement in the rabies situation within this year. There still remains a very deep reservoir of rabies in the animal population however, as evidenced by the number of positive brains among the 476 submitted for examination.

## SCHOOL OF MEDICAL TECHNOLOGY

Number of students in training.....	12
Number of students completing training.....	4
Number of students still in training.....	7
Post Graduate students in Parasitology.....	30
Arkansas .....	2
Colorado .....	1
Canada .....	1
Florida .....	2
Idaho .....	1
Indiana .....	1
Illinois .....	5
Missouri .....	1
Michigan .....	1
New Mexico .....	1
Ohio .....	3
Oklahoma .....	1
Pennsylvania .....	1
South Carolina .....	1
Texas .....	2
West Virginia .....	1

The School of Medical Technology is approved by the American Medical Association and by the Registry of Medical Technologists of the American Society of Clinical Pathologists. Well qualified students who hold a degree from a recognized college or university are accepted for one year of training. At the end of this period they are eligible for examination and registration by the Registry.

During the period of training students are of invaluable assistance to the Department. At the completion of training two of our students were employed to fill vacancies in the Department, one married and the other preferred employment elsewhere.

The Post Graduate course in Parasitology continues to attract Medical Technologists from distant points. Three are accepted each month for the course. In return for the training and experience they receive they give the Department valuable assistance.

#### MORGUE

Use of Morgue Amphitheatre for teaching and conferences:

	Sessions	Hours
Clinical Pathological Conferences .....	1	2
Pathological Conferences .....	78	79
Neuropathological Conferences .....	21	22
Tulane University Classes .....	173	246
Louisiana State University Classes .....	79	79
Burials prepared, including unclaimed bodies (usually still-borns), organs removed at autopsy and animals received by the Pasteur Institute .....	163	

According to a ruling by the Board of Administrators of Charity Hospital, and beginning on 10/28/44 the charge of fifty cents for an original death certificate was discontinued.

All unclaimed adult bodies are turned over to the Louisiana State Anatomical Board since it began to function following its creation by legislative act in May, 1944.

#### EQUIPMENT

An air-conditioning unit was installed in the Morgue Amphitheatre in an effort to relieve the intolerable heat in this sub-basement room. Unfortunately this unit has never operated satisfactorily. Efforts are being made to have it serviced and placed in satisfactory operating condition.

Two new modern stainless steel autopsy tables were purchased and installed in a large room in the morgue unit. The installation of these additional tables has relieved congestion when several autopsies arise simultaneously, and have eliminated delays in releasing bodies to the undertakers.

Fluorescent lighting and an exhaust fan were installed in the new autopsy room. This has made working conditions more comfortable and has increased the efficiency of the unit.

#### PERSONNEL

The shortage of medical personnel continues to be felt by the Department. Under the hospital quota one Resident was assigned to the Department of Pathology. He began his residency on October 1, 1944 and under the 9-9-9 program will complete his service on March 31, 1946.

In March the quota of Residents in Pathology was raised to two. A second Resident has been appointed and will begin his residency on July 1, 1945.

On July 1, 1944 the technical staff numbered 12 with 6 laboratory helpers. At this time there are 9 Medical Technologists and 3 Laboratory Helpers. It is expected that students of Medical Technology who will complete their training shortly will be employed to fill some of these vacancies.

The very efficient Medical Secretarial Staff has rendered invaluable service to the Department. In addition to the very heavy volume of records prepared they have assisted the Medical Staff in the preparation of scientific papers, compilation of statistical data from the departmental records, and the preparation of numerous statistical and other types of reports.

The most difficult positions in the Department to fill have been Morgue Attendants (autopsy assistants). Of the five positions only one has been filled continuously by a man who has been in the employ of the Hospital 16 years. Fifteen individuals have accepted employment to fill the other four vacancies. Of these, one man remained eight months, the others averaged from one day to one month. It is doubtful that this situation will improve until some time after the end of the war when those in military leave return or there is a change in the employment situation.

#### OTHER ACTIVITIES OF THE DEPARTMENT

The Director of the Department attended the Southern Medical Society convention held in St. Louis, Missouri in November.

With Doctors Schenken and Burns of the Visiting Staff from L. S. U. School of Medicine, an exhibit on the Pathology of Amebiasis, Histoplasmosis, Malaria and Mycetoma Pedis was presented which was awarded Honorable Mention by the Scientific Exhibits Committee.

Miss Esther McElwee, Acting Chief Medical Technologist, spent three months at Columbia University in New York studying Mycology.

The Director, who is a member of the Advisory Board of the Louisiana State Society of Medical Technologists, participated with Dr. Marion Hood, Visiting Parasitologist, in a Seminar on Parasitology at the Annual Meeting of the Society in April.

Dr. James Watt of the U. S. Public Health Service who has done such outstanding research in Enteric diseases has been sent to China to make further studies in that war area. During his absence his researches at Charity Hospital will be supervised by Dr. A. V. Hardy of the U. S. Public Health Service.

**REPORT OF HEART STATION  
ELECTROCARDIOGRAPHIC LABORATORY**

**July 1, 1944 — June 30, 1945**

November 19, 1945

Dr. O. P. Daly, Director, Charity Hospital, and  
Board of Administrators of the Charity Hospital  
New Orleans, Louisiana

Dear Sirs:

The accompanying report shows the work done by the Heart Station from July 1, 1944 through June 30, 1945. The figures refer to the number of electrocardiograms in each respective month. Many sound tracings with electrocardiograms and fluoroscopic examinations of the heart were made also in the current year but the breakdown for months is not available although the data was placed in the patients' records.

July .....	770	January .....	857
August .....	830	February .....	754
September .....	627	March .....	835
October .....	805	April .....	841
November .....	640	May .....	892
December .....	674	June .....	855
<b>Total .....</b>			<b>9380</b>
<b>Total number of fluoroscopic reports for same period.....</b>			<b>287</b>

## REPORT OF DEPARTMENT OF ANESTHESIA

July 1, 1944 to June 30, 1945

November 19, 1945

O. P. Daly, M.D.  
 Director, Charity Hospital  
 New Orleans, Louisiana

Dear Doctor Daly:

I submit to you the following report of the activities of the Anesthesia Department from July 1, 1944 to June 30, 1945.

The activities of the Anesthesia Department have differed little from those of previous years. The shortage of trained personnel has continued to be acute. Likewise, the shortage of technicians in the oxygen therapy has continued to be a problem.

Ten papers from the department were accepted for publication in various scientific medical journals. Members of the staff were invited to present papers at fourteen hospital staff meetings and medical conventions in and out of the city.

The following statistical data summarizes the professional activity of the department:

Ether .....	833	Local .....	2552
Nitrous oxide-oxygen .....	103	Spinal .....	1659
Nitrous oxide-ether vapor .....	220	Pentothal .....	89
Ethylene-oxygen .....	397	None .....	36

Sincerely yours,

JOHN ADRIANI, M.D.,  
 Director, Department of Anesthesia

## REPORT OF BLOOD PLASMA BANK

### July 1, 1944 to June 30, 1945

November 19, 1945

O. P. Daly, M.D.  
Director, Charity Hospital  
New Orleans, Louisiana

Dear Dr. Daly:

I submit to you the following report of the activities of the Blood Plasma Bank from July 1, 1944 to June 30, 1945.

The consolidation and centralization of the various blood banks heretofore conducted by individual doctors and services into one single unit under my directorship was accomplished October 1, 1944. Delays in securing apparatus and equipment caused by the war were disconcerting and retarded the organization almost eight months. The blood bank, as it is now arranged, consists of two units—a laboratory, which is located on the east wing of the 12th floor, and a donor's station, which is on the west wing of the first floor. The location of the donor's station on the first floor is a very desirable feature as it is readily accessible to donors, who as a rule, are not familiar with the hospital. The location of the laboratory, likewise, is a desirable feature because of its proximity to the operating rooms, inasmuch as most of the blood is used for surgery. The laboratory is staffed with three technicians, two laboratory helpers, and a maid. The laboratory is in charge of Mr. Joseph Stiles, who has done excellent work in the organization of the bank. Typing, matching, serological examinations, preparation, culturing of plasma, preparation of media, and other laboratory procedures incident to handling of whole blood and plasma are carried out in this division. The laboratory also is equipped with bottle washing equipment, a triple still for preparation of pyrogen free water, sterilizers, and other necessary items for preparation of equipment for collection of blood and storage of plasma. All blood is stored in the refrigerators on the 12th floor, and is distributed from this point. Unused blood is returned to the laboratory for disposal and storage.

The donors' station is staffed with four technicians. These technicians, who are graduate nurses, draw the blood and care for the donors. They are assisted by voluntary aides from the American Red Cross. It would have been impossible to operate the bank without the aid of these voluntary workers. The resident physician anesthetists are available to pass upon physical and other qualifications of the donors. Provisions are made for the segregation of colored and white donors. All blood is collected in the donor's station during the hours of 8 a.m. and 4 p.m. and stored in the laboratory after being typed and examined serologically. Facilities are available for the bleeding of twenty donors at one time should the occasion arise.

Donors are solicited by the members of the house staff from relatives and friends of the patients. Each service maintains an account in the bank on a debit-credit system. Blood is available twenty-four hours a day for emergencies and can be secured for such emergencies in the length of time required for matching.

Certain innovations and improvements have been instituted during the year. The open system heretofore employed has been discarded. The closed system is used exclusively in collection and storage of blood and plasma. The transfusion equipment is similar to and can be interchanged with that

used for other intravenous fluids throughout the hospital. Donors are now accepted according to the standards laid down by the American Red Cross and rejected if not physically fit. A system of reporting and investigation of reactions has been instituted. Rh studies, cultures, tests of pyrogen, and other precautions to insure the safety of transfusions have gradually been introduced.

In June 1945 the mobile unit donated by the American Legion Auxiliary was placed in operation for collecting blood throughout the state for processing into plasma. The unit visited various communities in the vicinity of New Orleans.

The following statistical data summarizes the professional activity of the department:

Blood donors typed .....	7,999
Recipients typed .....	5,726
Blood cross matched for transfusion .....	6,268
Blood released for transfusion .....	4,499
Blood matched in Emergency Laboratory .....	434
Serological Examinations Positive .....	319
Plasma Processed .....	122,000cc
Plasma released (500 cc units) .....	200

Sincerely yours,

JOHN ADRIANI, M.D.,  
Director, Blood Bank

## REPORT POLIOMYELITIS CENTER

July 1, 1944 to June 30, 1945

Prior to the year of 1943 an average of 108 cases of Poliomyelitis occurred annually (over a 10 year period) in the State of Louisiana for which there were no facilities available for treatment in the earlier stages of the disease. In order to meet this need a Poliomyelitis Center was established and operated jointly by the Section of Crippled Children Services, Louisiana State Board of Health and Charity Hospital, in cooperation with Tulane University Medical School and Louisiana State University Medical Center, and being financially assisted by various parish chapters of the National Foundation for Infantile Paralysis throughout the State.

This Center was located in New Orleans because orthopedic surgeons, pediatricians, and other medical specialists were willing and eager to offer their services, and Charity Hospital readily provided facilities. As a wartime measure it was felt that this Center could be utilized to serve the State as a whole, since other cities in the State could not supply the necessary medical personnel.

Many obstacles have been encountered in maintaining this Center. With the shortage of trained personnel it was often necessary that doctors, nurses and attendants work long hours in order to give a high degree of service. The problem of transporting children from remote sections to this Center was a tremendous task. Parents often found it impossible to visit their children at regular intervals. Their doubts and fears were natural ones. The personnel at this Center understood and tried to alleviate them. When it was possible for them to visit their children, they were impressed by the happiness and well-being of all the patients as well as their own child.

It was recognized that medical care, however good it might be, would not benefit the child to its fullest extent unless the emotional needs were recognized and fostered. For this reason parties, motion pictures, shows and musical programs were often given in the wards. The delight of the youngsters was a source of inspiration to all.

Now that the Poliomyelitis Center has met the emergency in caring for 320 cases of acute and suspected Infantile Paralysis patients coming from practically every parish in the State of Louisiana since its organization in 1943, many requests have been made in other areas in the State for centers to be established and operated in like manner. Plans have been suggested and facilities are available in the Shreveport and Monroe Areas. It is contemplated that such centers will be opened in the near future.

Poliomyelitis localized somewhat during 1945 in the northern area of the State, therefore it is logical to have poliomyelitis centers in these areas, especially since orthopedic surgeons, pediatricians, and other medical specialists have returned from the war and are now locating in the northern area of the state.

From July 1, 1944 to June 30, 1945 there were 103 cases admitted and treated in the Center. Fifteen per cent (15%) of this number were transferred or discharged as not being poliomyelitis. Eighty-five percent (85%) of all poliomyelitis cases reported to the Epidemiology Department, Louisiana State Department of Health, have been admitted and treated at the Poliomyelitis Center.

After the cases of poliomyelitis are discharged they are followed up throughout the State in the nearest orthopedic clinic maintained by the Section of Crippled Children Services of the Louisiana State Board of Health. At these clinics further instructions are given to the parents by the orthopedic surgeon, Pediatrician and physical therapist regarding care of the child in the home.

BRANCH J. AYMOND, M. D.,  
Director Poliomyelitis Center,  
Chief Crippled Children's Service,  
Louisiana State Board of Health.

## LUNG STATION

November 8, 1945

The Board of Administrators, and  
 Dr. O. P. Daly, Director  
 The Charity Hospital of Louisiana at New Orleans  
 1540 Tulane Avenue  
 New Orleans 13

Gentlemen:

From July 1, 1944 to June 30, 1945, the Lung Station continued to collect data on pulmonary function in normal children in order to establish average normal values for this age group. In addition the Station carried out studies of pulmonary function on 95 patients. As will be seen from the table below, the majority of these determinations have been done on patients being considered for thoracic surgery. In more than half of the patients being evaluated for projected surgery, catheterization of the bronchi was performed in order to establish the function of each lung. Each spirographic determination is supplemented by time-consuming chemical analyses of multiple samples of expired air. Tabulation of the patients studied in the Lung Station during the year is as follows:

Total number of patients studied .....	95
	No. of Patients
Normal Children .....	23
For Surgical Evaluation .....	40
For Medical Evaluation .....	12
	No. of Patients
Bronchospirography .....	29
Spirography .....	82
Bronchograms .....	20

Respectfully submitted,

JOHN H. SEABURY, M.D.  
 Director, Lung Station

## REPORT OF DEPARTMENT OF ALLERGY

July 1, 1944 to June 30, 1945

October 17, 1945

To the Board of Administration of Charity Hospital  
 1523 Tulane Avenue  
 New Orleans, Louisiana

Gentlemen:

I submit this my report for the year ending July 1945:

Despite the number of absentees called into the Service and the improved finances of those who remained, our Clinic has continued to prove its usefulness and necessity in serving the Public, as will be seen from the following figures:

Total patients visits .....	3,924
White .....	1,964
Colored .....	1,960
Consultations for other services .....	56

In 1945 due to neglect of weed cutting, the pollen concentration was high; we took this opportunity to check up at the height of the pollen concentration on our results:

Well controlled .....	53+
Very much improved .....	35+
Stat. .....	9+
Aggravated .....	2+

Our results are still most satisfactory in the control of all Allergies in children and the advisability of starting treatment in early life cannot be too strongly emphasized.

We found that the best results were obtained by high and frequent dosage especially in cases newly referred to our service. More lasting impression can be made in the first three months of treatment.

Among the new agents which were found effective have been modified histamine by needle and penicillin suspension by bronchial installation. We had to discard the 5% sulfathiazole emulsion which proved irritating.

We wish to thank the Director, the L.S.U., the efficient Nurses and the Druggist for their whole hearted cooperation.

Respectfully submitted,

NARCISSE F. THIBERGE, M.D.

ANNUAL REPORT  
OF THE STATISTICAL DEPARTMENT  
OF THE  
RECORD LIBRARY

July 1, 1944 to June 30, 1945

Remaining at beginning of year (Fiscal) .....	2,030
Admissions .....	42,860
Remaining at end of year (Fiscal) .....	1,882
Total hospital days .....	708,094
Discharges .....	40,614
Died .....	2,394
Average gross death rate (per cent) .....	5.58
Deaths within 12, 24, 36 hours of admission .....	602
Average net death rate (per cent) after deducting above .....	4.18
Cases reported to coroner .....	694
Daily avrage .....	1,940

Dr. O. P. Daly, Director  
 Charity Hospital of La.  
 New Orleans, La.

Dear Dr. Daly:

The following is the report of the Pharmacy Department for the year ending June, 1945.

Special Prescriptions filled-----	64,730
Narcotic Prescriptions filled-----	4,252
Stock Prescriptions filled-----	89,038

**Serums and Antitoxins purchased**

Anti Hemophilus Serum, Type B-----	126 Vials
Anti Pneumococcic Serum, Type 3, 50,000 units-----	5 Vials
Anti Pneumococcic Serum, Type 5, 50,000 units-----	4 Vials
Anti Pneumococcic Serum, Type 6, 50,000 units-----	13 Vials
Anti Pneumococcic Serum, Type 25, 50,000 units-----	3 Vials
Antivenin North American Anti-Sanke Bite Serum-----	20 Vials
Antivenin (Black Widow Spider Antivenin)-----	3 Vials
Brucellin 1 cc-----	8 Vials
Brucellergen 1 cc-----	8 Vials
Catarrhal Vaccine Combined 20 cc—V-151-----	80 Vials
Coli Combined Vaccine 5cc—V-196-----	50 Vials
Diphtheria Antitoxin 10,000 units-----	260 Vials
Diphtheria Antitoxin 20,000 units-----	630 Vials
Diphtheria Toxoid Fluid V-912-----	2 Vials
Diphtheria Toxoid, Alum Precipitated 5cc—V-910-----	20 Vials
Diphtheria Toxoid-Tetanus Toxoid, Combined, Alum Precipitated, V-914-----	150 Vials
Diphtheria Toxin for Schick Test (100 Tests) V-928-----	130 Vials
Gas-Gangrene Antitoxin, Polyvalent, Therapeutic-----	73 Vials
Immune Globulin 10 cc-----	23 Vials
Meningococcus Antitoxin 10,000 units, Bio 168-----	60 Vials
Mixed Vaccine Respiratory Infections (M.V.R.I.) 20 cc-----	152 Vials
Pertussis Vaccine, Prophylactic 5 cc, V-379-----	20 Vials
Pertussis Vaccine, Prophylactic, Alum Precipitated V-338-----	5 Vials
Scarlet Fever Streptococcus Antitoxin, Therapeutic Bio 115-----	5 Vials
Scarlet Fever Streptococcus Antitoxin for Schultz-Charlton Test Bio 151-----	10 Vials
Scarlet Fever Streptococcus Toxin for Dick Test Bio 154-----	10 Vials
Schick Test Control (10 tests)-----	30 Vials
Small Pox Vaccine V-5 (5 tests)-----	8 Vials
Staphlococcus Antitoxin 20,000 units-----	30 Vials
Staphylococcus Toxoid-----	7 Vials
Tetanus Antitoxin 1500 units-----	25,000 Vials
Tetanus Antitoxin 10,000 units-----	150 Vials
Tetanus Antitoxin 20,000 units-----	550 Vials
Tetanus Gas Gangrene, Prophylactic-----	1,300 Vials
Tetanus Toxoid, Alum Precipitated V-932-----	30 Vials
Trichinella Extract and Control V-735-----	15 Vials
Triple Typhoid Vaccine for Non-Specific Therapy, (100 million per cc) 5cc-----	144 Vials
Old Tuberculin 1cc-----	10 Vials
Typhoid H Antigen (10—2cc Vials) V-762-----	1 Pkg.
Typhoid Mixed Vaccine, Prophylactic 20 cc, V-765-----	304 Vials

**Arsphenamines Purchased**

Bismarsen 0.2 Gm (without solvent)-----	16,000 Ampules
Mapharsen 0.04 Gm-----	800 Ampules
Mapharsen 0.06 Gm-----	500 Ampules
Phenarsine Hydrochloride 0.068 Gm-----	1,900 Ampules
Phenarsine Hydrochloride 0.045 Gm-----	200 Ampules
Phenarsine Hydrochloride 0.68 Gm. (10 doses per amp.)-----	900 Ampules
Tryparsamide 1 Gm-----	300 Ampules
Tryparsamide 2 Gm-----	300 Ampules
Tryparsamide 3 Gm-----	300 Ampules

**Insulins Purchased**

Globin Insulin with Zinc, 80 units per cc-----	338 Vials
Insulin, 40 units per cc-----	1,100 Vials
Insulin, 80 units per cc-----	170 Vials
Protamine Zinc Insulin, 40 units per cc-----	900 Vials
Protamine Zinc Insulin, 80 units per cc-----	180 Vials

Respectfully submitted,

A. P. LAUVE,  
Chief Pharmacist

cc; Mr. Millet

## REPORT OF CHARITY HOSPITAL GUILD

July 1, 1944 to June 30, 1945

Report of Charity Hospital Guild. From July 1st, 1944 to June 30th, 1945. Is herewith respectfully submitted by its President, Mrs. C. Warren Gilmer:

## REPORT

Reclaimed Compressed Dressings Wrapped .....	24,735
Perineals .....	2,552
Needle Cases .....	347
Dakin Tubes .....	465

Thread Cards .....	10,590
Reclaimed Central Service Wrapped .....	347,865
Lap-Sixes .....	11,704
Central Service .....	827,888
Amputation Sponges .....	743,289
Cotton Balls .....	148,721
Masks .....	14,984
Compressed Dressings .....	127,470
Cellus .....	65,992
Safety Pins Wrapped .....	2,100
Tags .....	93,500
Eye Pads .....	1,348
Cellophane Wrapped .....	495
Total .....	4,313,064
Meetings .....	759
Attendance .....	6,148
Total from 1919 to June 30 1945 .....	37,633,783

I am very sorry that we are 2,173,956 less than 1944 but it is due to shortage of workers.

## OUR DIFFERENT GROUPS

Gumbel Girls	Mrs. Desvignes Colored Group
St. Margaret Daughters	St. Louis Cathedral
Syrian American Club	Mrs. Cooney's Sewing Group
Various Groups of A.W.V.S.	Grace Episcopal Church
Various Groups of A.R.C.	Church of Annunciation
Quite a few individuals worked at home for us	Civil Air Patrol
American Institute of Banking	Gates of Prayer Synagogue
American Federation of Labor	Esplanade Presbyterian Church
14th Ward Auxiliary	5th Division War Production Unit
Parker Memorial Church	Women's Organization of Propeller Club
Central Baptist Church	Crossman School
Rachel Sims Mission	Colton School
Beth Israel Sisterhood	Jefferson Community Church
Various Groups of Y.W.C.A.	Section 16 Needle Work Guild
P.E.O.	Carrollton Ave. Baptist Church
St. Charles Ave. Christian Church	St. George's Church
Quite a few High School Girls	Salem Evangelical Church
Thursday Needle and Thread Club	

Junior American Red Cross made 131 surgical gowns for us. Also 699 pairs of pajamas have been made for the Hospital by various ones of our outside groups. One of our workers, a Mrs. Hutchinson, cut out several dozen for us, but the larger part was cut out for us by the Famous Sternberg Inc., Co.

## OFFICERS AND BOARD MEMBERS OF CHARITY HOSPITAL GUILD

The Guild decided not to hold an election of Officers for 1945, holding the same officers until after the war. So we did not have an annual meeting in January, 1945 as we usually do.

Following is the list of Officers and Board Members.

Sister Stanislaus, Honorary President for life.
Mrs. C. Warren Gilmer, President
Mrs. L. P. Lapoutge, 1st Vice-President
Mrs. J. Schoen, 2nd Vice-President
Mrs. Charles Chehardy, 3rd Vice-President
Mrs. H. W. Kostmayer, 4th Vice-President
Mrs. D. N. Barr, Recording Secretary
Mrs. R. H. Baldwin, Treasurer
Miss Adele Reynaud, Corresponding Secretary
Mrs. H. E. Kuhner, Publicity Chairman, has resigned and so far we have appointed no one to take her place.

## BOARD MEMBERS

Mrs. N. J. Khoury	Mrs. M. H. Jamieson
Mrs. L. Bertucci	Mrs. S. L. Ebeling
Mrs. W. E. Westerman	

ANNUAL REPORT  
of the  
CLASSES FOR CONVALESCENT CHILDREN

---

ANNUAL REPORT  
of the  
CLASSES FOR CONVALESCENT CHILDREN

---

**ANNUAL REPORT  
of the  
CLASSES FOR CONVALESCENT CHILDREN**

During the period, July 1, 1944-June 30, 1945, the Classes for Convalescents, organized by the Orleans Parish School Board, continued to provide educational facilities for the hospitalized children on the Ninth Floor. From 9:00 A.M. to 3:00 P.M. each day, ambulatory patients attend classes in one of the solaria on W 900 or C 900.

In the composite picture of the Classes there were 653 White children and 401 Negro Children enrolled for the year. In each class the average daily number of pupils receiving instruction was 37.

The academic program is organized around the health progress of the child. Limited numbers, informal organization, and adaptable programs enable most children to make normal school progress. The aptitudes of the pupil-patients stimulate a social participation in school work which directly helps the children to develop wholesome habits and attitudes. In this manner the school serves as an important interlocking piece in the pattern of services given the child.

**EXTRA-CURRICULAR ACTIVITIES**

**Movies**

All kinds of visual aids lend much both to the academic and to the non-academic program. At least once each week an educational or a recreational film was shown to the youngsters in the classroom on W 900. During this year the Film Library of the White Class for Convalescents was the recipient of six cartoons from the following donors:

Grey Ladies of the American Red Cross.....	Two Films
Happiness Helpers .....	Two Films
Mrs. J. T. Nix .....	Two Films

**Music**

Music, in its various forms, is judiciously utilized to enrich the child's life. Patients become acquainted with some good music by the weekly programs of the American School of the Air and by victrola recordings. Piano accompaniment to pupil participation in singing for the mere joy of singing furnishes another avenue of recreation and relaxation.

A Spinet Piano was purchased this year for the White Class for Convalescents. The Citizens Committee donated a similar piano to the Colored Class for Convalescents when the class was established. An electric phonograph was presented to the Colored Class for Convalescents in May 1945. The White Class for Convalescents already owned a combination radio-victrola, a gift of Miss Carmelite Janvier. The Children will derive many hours of pleasure from the use of these musical instruments.

**Library Facilities**

The development of the individual pupil's interests, tendencies, and capabilities is dependent upon the proper use of books. In each classroom on the ninth floor there are several hundred library books available for the use of the student-patient. The content of the books is based on the experiences of children and each is excellently illustrated providing a source of stimulation for reading and learning.

The following is an account of the amount of money appropriated for the purchase of additional library books during the past year.

**White Class for Convalescents**

Allotment for books from the State Department of Education.....	\$ 71.50
---	----------

**Colored Class for Convalescents**

Allotment for books from the State Department of Education.....	\$ 59.29
---	----------

Zeta Phi Beta Sorority .....	100.00
------------------------------	--------

Individual Book Donors .....	31.33
------------------------------	-------

Paragon Club .....	10.00
--------------------	-------

A silver plaque commemorating the initiation of the Library project by the Zeta Phi Beta Sorority in November 1942 was presented to the class during Children's Book Week November 12-18, 1944.

**Crafts**

Because the child must be provided with a variety of experiences in the manipulation of tools and materials, a part of each school day is devoted to crafts. Children learn to do simple weaving on frames and looms, crocheting, knitting and soap carving. The making of place cards, favors, and party novelties is correlated with the work of this period.

**Parties and Recreational Activities**

Birthdays of the child-patient, special holidays, and anniversaries are always occasions for a party. The main object for these celebrations is to give the youngsters a good time and to send them back to their wards refreshed and happy. Listed below are some of the recreational activities of the year.

**White Class for Convalescents**

**Fifteen Birthday Parties**—On each occasion the Dietary Department made a birthday cake bearing the name of the birthday celebrant.

**Halloween Party**—Given by Mrs. J. T. Nix.

**Thanksgiving Party**—Sponsored by the Happiness Helpers.

**Christmas Parties**

1. Dec. 16—Cruiser's Auxiliary of Veterans of Foreign Wars.
2. Dec. 17—Happiness Helpers.
3. Dec. 19—Judie Cootiee Club—No. 60 (Ladies of Foreign Wars).
4. Dec. 20—Grey Ladies of the American Red Cross.
5. Dec. 21—Gifts and Candy presented by Junior WAACS.
6. Dec. 23—Elks—B.P.O.E.

**Valentine Party**—Mrs. J. T. Nix.

**George Washington Party**—Happiness Helpers.

**Saint Patrick Party**—Grey Ladies of the American Red Cross.

**Easter**—Grey Ladies provided each patient with a basket of Easter Eggs on Easter morning.

**Colored Class for Convalescents**

**New Year's Party**—Given by the Improved Benevolent, and Protective Order of Elks. At this time a gift presentation of thirty dollars was made for the Clothing Fund.

**Easter Party**—The American Red Cross sent filled baskets to each patient.

**June Party**—Sunshine Helpers presented the Colored Class for Convalescents with a wheel chair.

In general, it can be said that the Hospital Classes furnish the specialized curriculum necessary for an institution of this kind. The activities of the classes have two broad general objectives: First, the usual school purpose of providing educational facilities; secondly, but no less important, a program giving the child information, skills, and attitudes important for a satisfactory personality adjustment.

Respectfully submitted,

SELMA L. KLEIN, B.A., M.A.  
Teacher, Class for Convalescents

**VOLUNTEER ORGANIZATIONS ACTIVE IN CHARITY HOSPITAL**

American Red Cross  
Grey Ladies  
Nurses' Aides  
American Society for the Control of Cancer  
Surgical Dressings Division
